

ANIMAL TRANSPORT GUIDES

RESCHEDULED

Workshop: Animal Transport Guides Good practices for the transportation of horses

Although the practices in this workshop were developed with the aim of supporting the transportation of horses destined for slaughter, we strongly believe that many, if not all, of the practices presented during this workshop will be applicable to all horses, ponies and donkeys when transported and as such will be relevant to anyone involved in this industry.

This workshop is being delivered as part of the Animal Transport Guides project, commissioned by DG SANTE on behalf of the European Commission to develop and disseminate good and better practices for the transportation of livestock. More details of this project can be found here:

www.animaltransportguides.eu

In collaboration with DG SANTE, World Horse Welfare wishes to invite you to the 'Good practices for the transportation of horses' workshop at one of the two locations below.
